## UNRIVALED FERTILITY. RESULTS THAT STICK.

Fine tune your nutrition program using timely foliar applications of Coron® during vital growth stages.

In-season, environmental challenges can hinder a plant's ability to take up nutrients in the soil. **Coron** provides superior fertility to address nutrient needs in-season. When applied directly to the plant, it provides more efficient uptake versus granular fertilizers. With granular fertilizers, plant roots have to take up nutrients in the soil, taking longer to reach the plant.

Coron provides the flexibility to make timely applications without hesitation. Because Coron has excellent tank mix compatibility, it allows you to fertilize your plants while applying plant protectants in one application. Its adhesive properties keep the application on target to provide longer availability for plant uptake.

For unrivaled fertility and results that stick, contact your local Helena representative or authorized dealer for more information about Coron.

### PRODUCT HIGHLIGHTS

- **Controlled-release, liquid fertilizer with unique adhesive properties**
- **Promptly addresses nutritional needs in-season**
- **Adheres to plant surfaces to increase nutrient uptake**
- **Excellent tank mix compatibility**
- **Superior plant safety**
- **Highest quality control & quality assurance standards in the industry**

20

With more than 20 years of research, development and applications in all 50 states, Coron has proven performance in multiple environments.

# MANAGE EVERY DROP

Improve irrigation efficiency with Resgenix™, a new water-use management tool from Helena.

When it comes to water management, it pays to be sustainable. **Resgenix** is a water-use management tool designed to increase irrigation efficiency in turf and ornamental applications.

Resgenix is an easy-to-use polyacrylamide, or PAM, designed to both increase water retention and infiltration in various soil types. It improves aggregation and increases pore space. This strengthens water-holding capacity and reduces standing water due to poor infiltration.

Unlike other water-use management products, Resgenix doesn't require any special equipment for application. Its convenient liquid formulation can be applied through irrigation water or conventional spray applications with ease. Resgenix also eliminates time-consuming mixing problems with a versatile formulation that is compatible with most turf management products.

Improve irrigation efficiency and manage every drop with Resgenix. Contact your local Helena representative or authorized dealer for more information.

## PRODUCT HIGHLIGHTS

- Improves irrigation efficiency
- Improves soil aggregation in all soil types
- Strengthens water holding capacity
- Helps mitigate erosion, run-off & soil moisture evaporation loss
- Provides application versatility & easier mixing compared to market standards
- Minimal phytotoxicity & safe for use in aquatic environments
- Labeled for use through various conventional application & irrigation methods

## Maintain turf and ornamentals with *powerful protection* from wildlife.

Trico® Pro safeguards turf and ornamentals from wildlife damage with a user-friendly, dual-action spray. By effectively repelling deer, elk, moose and rabbits, it protects the quality and aesthetics of golf courses, nursery stock, landscaping and recreational areas.

Trico Pro uses natural ingredients to deter deer and other unwanted animals from browsing and feeding on ornamentals. It targets the senses of taste and smell, producing long-lasting protection after a single application.

Unlike other wildlife repellents, Trico Pro produces a very subtle odor, which is non-irritating to humans but highly effective to the keen senses of animals. Its dual-action protection is delivered in a convenient, liquid concentrate that is easy to use and gentle on equipment.

With Trico Pro on your side, you can focus on what matters most – preserving healthy, vibrant ornamental growth and pristine turf stands. Contact your local Helena representative or authorized dealer for more information on Trico Pro.
