UNRIVALED FERTILITY. RESULTS THAT STICK.

Fine tune your nutrition program using timely foliar applications of Coron[®] during vital growth stages.

In-season, environmental challenges can hinder a plant's ability to take up nutrients in the soil. **Coron** provides superior fertility to address nutrient needs in-season. When applied directly to the plant, it provides more efficient uptake versus granular fertilizers. With granular fertilizers, plant roots have to take up nutrients in the soil, taking longer to reach the plant.

Coron provides the flexibility to make timely applications without hesitation. Because Coron has excellent tank mix compatibility, it allows you to fertilize your plants while applying plant protectants in one application. Its adhesive properties keep the application on target to provide longer availability for plant uptake.

For unrivaled fertility and results that stick, contact your local Helena representative or authorized dealer for more information about Coron.

PRODUCT HIGHLIGHTS

- **Controlled-release, liquid fertilizer with unique adhesive properties**
- **Promptly addresses nutritional needs in-season**
- **Adheres to plant surfaces to increase nutrient uptake**
- **Excellent tank mix compatibility**
- **Superior plant safety**
- **Highest quality control & quality assurance standards in the industry**

20

With more than 20 years of research, development and applications in all 50 states, Coron has proven performance in multiple environments.

CORRECT LOCALIZED DRY SPOTS

Target the symptoms of dry soils and water repellency with a superior level of performance. **Aristocracy**® is a nonionic wetting agent and soil conditioner that prevents and treats localized dry spots (LDS) and other problem areas in turf to keep grass growing in top condition.

Aristocracy corrects LDS, improving soil and turf health and quality with preventative and curative action. Utilizing a soil conditioner to improve soil wetting with vertical and lateral water infiltration, Aristocracy promotes consistent water flow into and throughout the root zone.

Aristocracy can be applied year-round to promote healthy greens, tees, fairways, lawns and sports turf. Remaining active in the soil for up to 40 days after application, it has shown impressive results in turf types such as Bentgrass, Bermuda, Poa annua and Paspalum.

For more information on how Aristocracy can correct LDS, contact your local Helena representative or authorized dealer.

PRODUCT HIGHLIGHTS

- Promotes healthier soils for healthier, high-quality turf
- Corrects water repellency problems
