

THE NUTRITION YOU KNOW. THE EXPERTISE YOU NEED.

When your plant is hungry for K, feed it K-Leaf® Versa, powered by ENC® Formulation Technology to enhance nutrient uptake for healthier plants.

K-LEAF®
VERSA

K-Leaf Versa is a foliar nutritional that provides a necessary requirement for stronger, healthier plants by combining the most complete source of foliar potassium with **ENC Formulation Technology**. In addition to meeting K needs at critical growth stages, K-Leaf Versa also contains chelated micronutrients to supplement your current fertility program.

K-Leaf Versa contains ENC Formulation Technology to enhance nutrient uptake and minimize spray application problems. With superior plant safety and the flexibility to address nutritional needs in season, you can be confident in your investment.

Provide your plant with a highly concentrated source of 29% K, plus added micronutrients for increased strength and health. To learn more about K-Leaf Versa, contact your local Helena representative.

PRODUCT HIGHLIGHTS

- Meets potassium needs at critical growth stages
- Added micronutrients supplement fertility programs
- Superior plant safety
- Labeled for multi-plant use
- Contains **ENC Formulation Technology**:
 - Enhances nutrient uptake to help correct plant nutrient deficiencies
 - Enhances tank mix compatibility
